EDUCATION

Honors Bachelor of Technology, Software Development

Seneca Polytechnic - Toronto, Ontario

- GPA: 4.0/4.0
- Recognized on the President's List for academic excellence, 6 consecutive terms.

SKILLS

Tracking & Tagging: GTM (web & server-side), GA4, dataLayer, Meta Pixel & CAPI, Google Ads conversions, ad pixels, tag QA and debugging.

Data Analysis & BI: SQL, SQL Server, Python (pandas, NumPy), SAS, Excel, Looker, Looker Studio, Power BI, Tableau.

Data Engineering: Adverity, dbt, ETL pipelines, Azure Data Factory, Apache Spark, SAP data extraction.

CRM & Automation: n8n, HubSpot, Salesforce, Power Automate, REST APIs.

AI & ML: Claude (Skills, Claude Code, Cowork), OpenAI and Gemini APIs, LangChain, LangGraph, RAG, Pinecone, prompt engineering, scikit-learn, TensorFlow.

Web & Cloud: JavaScript, HTML/CSS, Node.js, React, FastAPI, AWS, Azure, Docker, Git.

QA & Delivery: Selenium, Robot Framework, LoadRunner, SonarQube, Jira, Agile.

EXPERIENCE

Hotspex Media, Toronto, ON

Nov 2025 – Present

Data Analyst, MarTech & Tracking

- Implemented and validated GTM tracking for agency clients across GA4, Google Ads, Meta and other ad pixels.
- Built server-side GTM and Meta CAPI setups for server-to-server conversion tracking.
- Translated client pixel sheets into GTM builds: dataLayer events, triggers, variables and platform tags.
- Investigated and fixed tracking and data collection issues on client sites.
- Synced leads from website forms into HubSpot and Salesforce with n8n workflows.
- Built ETL pipelines with Adverity and dbt.
- Supported the reporting team with Looker and Looker Studio.
- Automated GTM builds from pixel sheets with Claude Skills, Claude Code and Cowork to cut setup time.

CBV Collections Services LTD, Markham, ON

Jun 2022 – Nov 2025

Data Analyst, Credit Operations & Reporting

- Analyzed credit account data in SAS, SQL and Python to find discrepancies and support compliance.
- Automated SAS reporting workflows for account monitoring and risk assessment, reducing manual effort.
- Built Power BI dashboards to track credit performance, risk metrics and KPI trends for business stakeholders.
- Optimized SQL Server databases and queries for faster reporting.
- Built Python and Node.js tools that pull data from multiple sources through APIs, reducing manual input errors.
- Automated recurring workflows with Power Automate.
- Extracted and reconciled SAP data for accurate financial and operational reporting.
- Built task tracking and production monitoring dashboards to improve workflow planning and on-time delivery.
- Gathered reporting requirements with cross-functional teams and wrote guides for non-technical users.

CGI Inc, Toronto Financial Unit, Toronto, ON

May 2024 – Aug 2024 | Jan 2025 – May 2025

QA Automation Engineer, Data & ETL Testing (Co-op)

- Automated SWIFT MT-MX message validation with Java scripts, reducing manual processing by 40%.
- Built Selenium and Robot Framework test suites that cut regression testing time by 30%.
- Ran LoadRunner performance tests to confirm system reliability at 1M+ transactions per day.
- Tested ETL pipelines in Azure Data Factory to confirm data transformed and loaded correctly.

- Validated Power BI dashboards against source data and fixed inconsistencies before stakeholder reporting.
- Integrated SonarQube to check code against maintainability and security standards.
- Worked with developers and business analysts in an Agile team, managing test cases and defects in Jira.

PROJECTS

Real-Time Fraud & Transaction Analytics Platform ([Link](#)) Jan 2024 – Dec 2024

Python, SQL, Spark, AWS Lambda, Node.js, Next.js, Docker, Tableau, Power BI, REST API

- Built a real-time transaction system that flags anomalies with ML models at 90% accuracy.
- Built Tableau dashboards for stakeholders to monitor fraud alerts and KPIs in real time.
- Automated reporting with Python scripts, reducing data processing time by 50%.

Agentic AI Support Ticket Workflow ([Link](#)) Sep 2025 – Oct 2025

React, Node.js, Gemini API, Inngest, LangGraph, JavaScript, Event-Driven Architecture, Prompt Engineering

- Built a full-stack support ticket system where AI agents handle each workflow stage.
- Automated ticket assignment and response generation with the Gemini LLM.
- Orchestrated the workflow in real time with Inngest and LangGraph.
- Tuned prompts so AI responses give structured, actionable guidance on support requests.

Medical Assistant Chatbot (RAG-based) ([Link](#)) Aug 2025 – Oct 2025

Python, FastAPI, LangChain, Pinecone, Groq LLaMA3-70B, Streamlit, RAG Architecture

- Built a RAG chatbot that answers medical questions from user-uploaded PDFs.
- Built the text extraction, chunking and embedding pipeline with Google/BGE embeddings and Pinecone.
- Integrated Groq LLaMA3-70B through LangChain for context-aware answers.
- Deployed the app on Render with a FastAPI backend and Streamlit UI.

Sentiment Analysis Bot ([Link](#)) Oct 2024 – Dec 2024

Python, OpenAI API, LangChain, Logistic Regression, PRAW (Reddit API), Streamlit

- Classified live Reddit posts and comments as positive, negative or neutral with OpenAI GPT models and LangChain.
- Automated text preprocessing and ingestion with PRAW for real-time analysis.
- Built a Streamlit dashboard to visualize sentiment trends.

AWARDS

- **Employee of the Month, CBV Collections Services:** accurate data analysis and timely reporting.
- **Co-op Student of the Term, CGI Inc:** QA automation and ETL testing work.
- **Dean's Honour Roll, Seneca Polytechnic:** high academic performance in software development courses.
- **Top Contributor, Seneca Software Development Club:** helped peers with coding projects and workshops.

LEADERSHIP & ACTIVITIES

- **Hack the North 2024:** built a financial analytics dashboard with Python, Node.js and Power BI.
- **Seneca Innovation Challenge 2023:** contributed to an AI-based scheduling assistant built with Python and Flask.
- **Workshop Organizer, Seneca Software Development Club:** led Python and cloud computing workshops.
- **Peer Mentor:** guided junior students on Python, Git and software development best practices.
